

New Press Technology To Serve You Better

Symmco's newest presses offers advanced technology not typically available to industrial markets.

Our New Osterwalder and Dorst Hybrid Hydraulic/Mechanical Molding Presses Allow You To:

- Utilize the multi-levels to produce complex parts
- Mold current PM parts that are now heavily machined
- Eliminate secondary operations
- Convert parts made from castings or plastics that require machining
- Convert current multi-part design into one piece
- Improve the function and/or reduce the cost of your current product

Presses capable of producing...

- Parts requiring up to 500 tons to press
- Lengths up to 3"
- OD up to 7.5"
- Medium to high volume production quantities
- Density up to 7.2 gms/cc
- Higher accuracy in tolerance control
- 3 top and 4 bottom levels
